To whom it may concern

This letter is to provide circumstances around the major upgrade of the cooling plant at Port Central Shopping Centre Port Macquarie.

In 2012 the company engaged in the removal and replacement of existing R22 plant to a new high efficiency magnetic bearing chiller plant incorporating a new optimised BMS system.

The specification, design, staged works and the commissioning of this system by Phillip Hangyasi is without doubt what has led to the success of this installation. Of note were the staged works carried out to have minimally impact to the workings of the shopping centre.

The systems went on to achieve all its pre-stated goals, one of them being a NABER 5 star rating.

If you wish to contact me please find my details below.

Yours faithfully
